LIBRARIAN'S REPORT

To the Trustees of the Kimball Public Library:

The library has been open this year from 2 to 6 o'clock Saturday afternoon. Soon after gas rationing went into effect it deemed advisable to close during the hours from 6 to 9 o'clock. In previous years the hours had been from 2 to 5 o'clock and 6 to 9 o'clock. Beginning April 1 we will resume the hours as previously kept. During this past year the schools have served as sub-stations, this being done in some communities. It has been found that if material is at hand there is definitely more of an incentive to read. The teachers have been very helpful in carrying out this new program.

The largest number of books taken out during the year has been 2157, the largest in one day 31.

Respectfully Submitted,

BEATRICE E. REYNOLDS

REPORT OF THE SUPERINTENDENT OF SCHOOLS

To the School Board and Citizens of Atkinson:

It is with pleasure that I submit my annual report as Superintendent of Schools. This report deals with the Atkinson schools for the school year July 1, 1944 to June 30, 1945. It is accompanied by reports of Mrs. Soule and Mrs. Thompson.

As in the past I am presenting information about our schools in statistical form. Many interesting facts can best be shown in this manner. I commend these tables as well as the reports just mentioned, to your attention.

There have been no changes in the teaching staff since my last report. We are very fortunate in times like these to have such good teachers for our children.

The enrollment last year was 61 as compared with 65 the year before. The school attendance averaged 87.7 per cent of the membership. Six boys and girls completed the work of grade eight. All of these entered the Academy.

For three years now only the most urgent repairs have been made on school buildings and equipment for the reason that war conditions have greatly restricted supplies of materials and labor. The Primary room is in need of both paint and varnish. The size of the available playground at this building is a real handicap to the teacher and children.

For a number of years the five towns that make up our Supervisory Union have owned and used a silent motion picture machine. The motion pictures have been very helpful, especially in the teaching of History, Geography and Health. At present the majority of recent educational films are made for sound machines. I hope it will be possible soon to exchange our projector for a sound machine. The rapid rate of learning in the army is attributed, to a considerable extent, to the use of motion picture machines.

Nearly every classroom has one or more children with some hearing impairment. The average for the country is three such children per classroom. Hearing impairment can be measured by a special scientific device called an audiometer. These tests are

to be given to all children during this school year by Mrs. Soule. An audiometer has been loaned to us by our State Board of Education. It has been found that 60% of the hard of hearing can be given the aurological care he needs. Those children that the doctors can not help become educational problems. Instruction in lip reading becomes necessary in extreme cases. Speech defects are often caused by inability to hear certain sounds.

We hope it will be possible to hold a dental clinic soon.

Last Spring the New Hampshire Legislature passed a revised Teacher Retirement System which gives our teachers worthwhile retirement privileges. Women may retire at sixty years of age and men at sixty-five, providing their term of service meets the requirements. The retirement fund is built up by contributions, both by the teacher and the school district in which she is employed. A majority of the teachers of our state have joined the retirement system. Teacher Retirement Systems help to build better schools by maintaining efficiency and economy in the use of school funds; by raising the morale of the school personnel; by holding good teachers in public school service.

The school nurse, Mrs. Jessie Soule, R. N., is continuing her good work in the schools. She has made many home calls as well as the regular school visits in the interest of children's health. She has been generous in furnishing transportation to children at clinics and other remedial work.

"War Stamp Day" became a weekly institution during the war. It helped children learn to save, by making it easy for them to save. It taught arithmetic, attitudes of responsibility, and an appreciation of the citizen's part in the government. Schools that wish to continue in peace time the educational advantages of "Stamp Day," will be able to get United States Savings Stamps as formerly. Study units and teaching aids in the field of personal money management will be available. It is hoped that at least some of our schools will continue this valuable project.

Teaching of the basic skills is the essential task of the schools and it has been our plan to see that the job is thoroughly done by means of the best accepted methods. In order for pupils to succeed in school work, it is necessary that they possess a good foundation in reading habits and abilities. For this reason a substantial part of book expenditures has been to continue to equip elementary grades with a good reading system supplemented by

work book exercises for reading growth, with correct language habits in writing and speaking.

The progress made by each pupil in grades one to eight will be checked by an achievement test during the year and as early as possible after the middle of the year. These tests help us understand the educational needs of the child and the class.

For the Teachers, the School Board, and myself, I express the common desire that a larger number of parents and friends visit the schools. If parents will come to school to see their children at work, what they are doing, what they are given to do with, and how their work is directed, it will give them first hand information concerning our schools.

In conclusion I wish to express my appreciation of the fine spirit of cooperation on the part of the School Board, Teachers, and the Community.

Respectfully submitted,

WILLIAM J. NELSON,

Superintendent of Schools.

REPORT OF SUPERVISOR OF MUSIC

To Mr. William J. Nelson, Superintendent of Schools:

I hereby submit my annual report as Supervisor of Music in the Schools of Atkinson.

The music program in our schools provides an integral experience which develops an understanding of and a love for music. The first step is to let the child listen to the singing of simple songs with a good tone quality. His next step is his own acquirement of a beautiful tone. Along with the development of tone quality, consideration is given to expression and diction. As the children develop in singing, listening, and music reading, they learn to sing

in parts, always an interesting experience. The adult male voice becomes interesting as a conscious singing and listening experience as the boy's voice changes. It is usually at this time that such classifications as soprano, alto, tenor and bass take on a definite meaning.

Listening is the basis of all music learning. In music study, from the first song taught by imitation listening remains of great importance through the succeeding years. Through listening children become acquainted with the music of the master composers.

For your co-operation and that of the teachers, I am most grateful.

Respectfully submitted,

EVA W. THOMPSON.

Prevent Forest Fires—It Pays

An average of 7,300 acres of woodland are burned over by forest fires in New Hampshire each year destroying many thousand dollars worth of property of all description. It costs many additional thousands of dollars and requires valuable man hours, taken from other essential work, to extinguish them. These losses affect the personal fortunes of the owners, and town and state economies. Everyone loses because of them.

Analysis of fire causes reveals the fact that more than 98 percent of all forest fires are, consistently, the result of human carelessness and are preventable!

We have been extremely fortunate during the past few years. Favorable fire weather and war time restrictions on travel which kept people off the highways and out of the woods have aided materially in reducing fire risks, keeping fires fewer and fire losses low.

We now face changed conditions. People can travel freely. Their love for travel and the freedom of the woods will bring them out in ever increasing numbers. This will step up the fire risks materially. The accelerated cutting of the war years has resulted in additional thousands of slash acres. These factors, combined with a possible dry season and human carelessness could easily produce a catastrophe. Everyone must, consequently, be on his guard. He should

1. Be careful with fire or when smoking in or near woodlands.
2. Cooperate with the local forest warden and his deputies by
 - a. Abiding cheerfully with whatever restrictions it may be necessary to impose. They are intended only to be helpful.
 - b. Securing permits to burn debris when the ground is not covered with snow.
 - c. Seeing that others comply with the requirements.
 - d. Promptly coming to the warden's assistance when needed.

If these few fundamental practices are followed it will be possible to PREVENT a large proportion of FOREST FIRES from starting.—that PAYS!

FOREST FIRE WARDEN.
